Africa Success Stories

5 Case Studies from CHANFER Installations Across Africa

Africa represents 28% of CHANFER's global installations. Our customers range from local entrepreneurs launching their first detergent brand to multinational FMCG companies expanding their African footprint. The following case studies illustrate typical project scope, timelines, and outcomes.

Case 1: Lagos, Nigeria — 15,000 BPH PET Bottle Line

Client: Mid-sized local detergent manufacturer, 8 years in business

Challenge: Replace aging 4,000 BPH line installed in 2015. Output target 15,000 BPH to capture growing Lagos and Ibadan markets. Limited factory footprint (1,800 m²).

Solution: Compact 15,000 BPH rotary line (24-head filler, 8-head capper, 12-head labeler, shrink sleeve tunnel, wrap-around carton packer). Total floor space 18m × 6m. Servo-driven filling for ±0.3% accuracy on 500ml-2L formats.

Timeline: Inquiry to commissioning: 14 weeks. Production: 7 weeks. Shipping: 28 days (Shanghai → Lagos via sea+rail). Installation: 12 days. Total: 22 weeks.

Investment: $245,000 (FOB Shanghai) + $8,500 sea freight + $18,000 installation

Outcome: Production increased from 80 tons/day to 280 tons/day. ROI achieved in 14 months. Customer now exporting to Ghana, Cameroon, and Senegal.

Case 2: Cairo, Egypt — 6,000 BPH Concentrate Line

Client: Family-owned concentrate detergent producer, 2nd generation

Challenge: Launch new ultra-concentrate (3X) product line. Required high-viscosity filling (8,000-12,000 cP) and nitrogen-flushed bottle headspace for 24-month shelf life.

Solution: 6,000 BPH servo-filling line with heated product tank (40°C), nitrogen purging station, and integrated cap-tightening torque control. CIP cleaning for product changeover in 25 minutes.

Timeline: Inquiry to commissioning: 18 weeks (longer due to EAC + Egypt customs).

Investment: $128,000 (FOB) + $12,000 air freight (urgent delivery)

Outcome: Concentrate product now represents 35% of customer revenue, up from 0% pre-project. Premium pricing 40% above standard products.

Case 3: Nairobi, Kenya — 3,000 BPH Pouch Line for Sachets

Client: Low-cost sachet detergent specialist, serving East African market

Challenge: Switch from manual sachet filling (200 sachets/hour per operator) to fully automatic line. Target 2,400 sachets/min for 25ml-100ml formats.

Solution: Form-fill-seal rotary line with 8-lane filler, 4-side seal, and integrated bundling station. Servo-driven film pull for ±1mm cut accuracy.

Timeline: 11 weeks inquiry to commissioning.

Investment: $72,000 (FOB) + $5,500 sea freight (Mombasa) + $7,000 installation

Outcome: Production increased 60x. Customer gained 22% market share in Kenya sachet segment within 18 months.

■■

Case 4: Casablanca, Morocco — 10,000 BPH Multi-Format Line

Client: Multinational FMCG (French-owned, 4 brands in Morocco)

Challenge: Standardize 4 product lines (dish soap, laundry liquid, fabric softener, multi-purpose cleaner) on a single flexible line. Format changeover in 15 minutes.

Solution: 10,000 BPH modular line with quick-change format parts, recipe-driven PLC (Siemens S7-1500), and integrated vision system for label verification. OEE target 85%.

Timeline: 16 weeks. Detailed FAT (Factory Acceptance Test) in Guangzhou: 5 days.

Investment: $215,000 (FOB) + $24,000 (incl. FAT, FAT travel, sea freight)

Outcome: OEE consistently 87-89%. Format changeover achieved in 12 minutes. Customer ordered 2 additional lines for Tunisia and Algeria within 12 months.

■■

Case 5: Addis Ababa, Ethiopia — 25,000 BPH Industrial Line

Client: Government-affiliated industrial detergent manufacturer

Challenge: First large-scale detergent plant in Ethiopia. Local government requirements: 70% local content (locally sourced bottles, cartons), training of 40 local operators.

Solution: 25,000 BPH complete line including RO water system (5,000 L/hr), CIP cleaning, shrink wrap, palletizer. Special focus on operator training: 2 weeks in China + 4 weeks on-site training.

Timeline: 20 weeks. Site preparation by customer: 12 weeks in parallel.

Investment: $485,000 (FOB) + $45,000 (shipping, installation, training)

Outcome: Plant launched on schedule, supplying 40% of Ethiopian industrial detergent demand. Featured in Ethiopian Industrial Development Corporation annual report.

Common Success Factors

- 100% of customers received on-time delivery
- Average installation time: 10 days (range 7-14 days)

- Operator training included: 2 weeks in China, 2 weeks on-site
- Spare parts inventory within 48-hour reach of every customer
- Multi-language support: English, French, Arabic, Swahili, Portuguese
